Renewables working together: Building Back Better through a Green Recovery

When: Tue, Jun 30, 2020 1:00 PM - 2:15 PM BST

Background

The Covid-19 pandemic has created the biggest global crisis in generations. While some of the lockdown measures are being eased, governments are devising stimulus and recovery packages to shape societies and economies for years to come.

Objective

The webinar will focus on the trends and opportunities for how bioenergy, geothermal, hydropower, solar and wind technologies can work together to create a 'green COVID-19 recovery'. Speakers representing each of these technologies will present how renewables working together can build on Covid-19 recovery strategies to scale up climate action and accelerate access to clean, safe, reliable, and affordable energy for all.

Speakers

Eddie Rich, Chair of Ren Alliance
Rana Adib, Executive Secretary at REN21
Dolf Gielen, Director, IRENA Innovation and Technology Center (TBC)
Paolo Frankl, Head of the Renewable Energy Division at IEA (TBC)
Bharadwaj Kumamuru, Executive Director at WBA
Marit Brommer, Executive Director at IGA
Cristina Diez Santos, Senior Analyst at IHA
Stefan Gsänger, Secretary General at WWEA
Jennifer McIntosh, Executive Secretary at ISES
