HELLAS

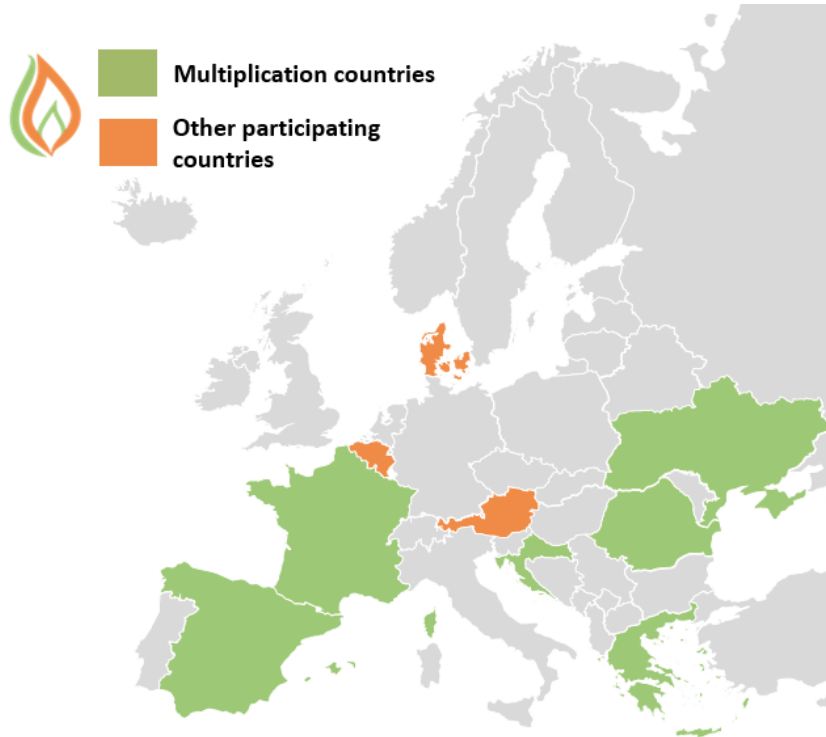

WBA Webinar Series – Agricultural Residues

Webinar 2: National experiences on feedstock mobilization, policies and regulations

28th January 2020 // 11.00 – 12.30 CET

This project has received funding from the European Union's Horizon 2020 research and innovation programme under Grant Agreement No 818369. This document reflects only the author's view. The Innovation and Networks Executive Agency (INEA) is not responsible for any use that may be made of the information it contains.

Technical partners (GR, ES, AT)

European association (BE)

National multipliers (RO, UA, FR, ES, GR, HR)

⇒ **Providing support to develop the use of agrobiomass heating in Europe**

Straw & network expertise (DK) Social sciences expertise (BE)

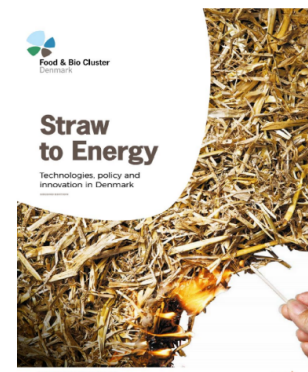

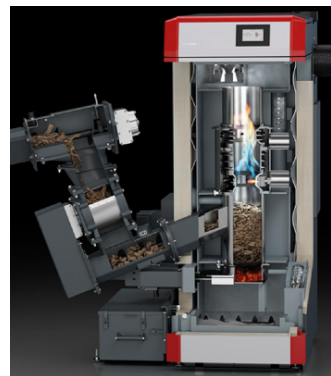

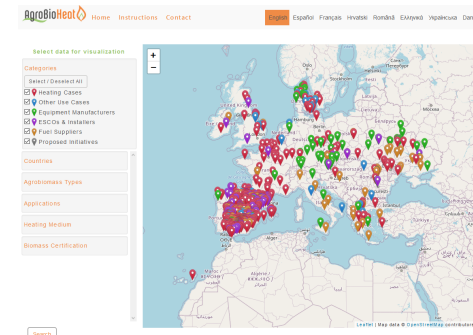

Agrobiomass facility operator (FR)

This project has received funding from the European Union's Horizon 2020 research and innovation programme under Grant Agreement No 818369.

- Engage with local, regional, national stakeholders and support new agrobiomass heating initiatives
- Identify and promote existing success cases
- Demonstrate compliance of state-of-the-art technology with EU emission limits through combustion tests in lab-scale and operating facilities
- Recommend policy interventions and advocate, analyze public perceptions
- Enhance sector visibility and capacities through dedicated actions: Observatory, fairs, site-visits, matchmaking events, training
- Communicate and disseminate
