

**Joint WBA & GBEP Webinar:
Small-scale biomass applications for Clean Cooking**

Date: March 18th, 2025

Time: 15:00 CET

Registration: [Link](#)

Description:

The **World Bioenergy Association (WBA)** and the **Global Bioenergy Partnership (GBEP)** are hosting a webinar on modern bioenergy solutions for clean cooking as one of the pathways for a sustainable and decentralized energy transition. These technologies not only expand modern energy access and reduce reliance on traditional fuels but also contribute to better food security and nutrition, especially in developing contexts.

This webinar will offer a real-world case study on micro gasification for institutional cooking to showcase how small-scale biomass systems are increasing cooking efficiency, improving human health and nutrition, and supporting environmental sustainability.

Agenda:

Opening Remarks

Moderator: Tiziana Pirelli, Global Bioenergy Partnership (GBEP)

Presentation 1: *Linda Migliorati (FAO, Food and Nutrition Division)*

Clean Cooking: An Enabler of Better Nutrition. Key findings and pathways to action

Presentation 2: *Sylvain Rucyaha (BioMassters, Director of Business Development and Sales)*

Outcomes of a pilot project on micro gasification for institutional cooking in Rwanda

Q&A and Discussion

Open floor for questions from the audience and speakers' insights

Closing Remarks

WBA & GBEP
