

WBA Webinar

Ready or Not: How the World is Preparing for CORSIA with SAF Targets

In collaboration with ASAFA

Date: September 3rd, 2025

Time: 11:00 CEST

Registration: [Link](#)

Description:

CORSIA's offsetting requirements are already live for voluntary participants, and the mandatory phase starts in 2027. That deadline is closer than it looks, and the gap between where the industry stands today and where it needs to be is still significant. This webinar takes stock of where states and airlines are in their CORSIA compliance journey, what SAF targets are emerging across key markets, and whether the supply, certification, and policy infrastructure is keeping pace. Speakers will cover the latest developments in eligible fuel frameworks, national SAF targets, and what operators can realistically expect to procure and claim in the years ahead.

Agenda:

Bharadwaj Kummamuru, WBA Executive Director

Welcome & Introduction **(5min)**

Gabriel Ho, CSO, Asia SAF Association (ASAFA)

Industry State of Play - Key takeaways from the WBA-ASAFA Factsheet **(15min)**

Lilit Afram, Sustainability Strategist, Swedavia

Infrastructure Readiness - Refueling, logistics, and supply **(15min)**

Sylvain Verdier, Renewable Fuels Advisor, Topsoe

Technology Readiness- What's driving or limiting SAF production scale-up **(15min)**

Roundtable Discussion (5 min, if time allows)

Open discussion moderated by Bharadwaj Kumammuru
