

## World Bioenergy Association Webinar (India Series)

Matching biomass supply and demand cost-effectively – optimized aggregation and supply chain efficiency in India

**Date:** July 10<sup>th</sup>, 2024

**Time:** 14.00 IST / 10.30 CEST (2 hours)

**Registration:** [Link](#)

### **Description:**

Every year, millions of tonnes of agro-residues are burnt in the fields in India due to a lack of a viable market. Stubble burning is leading to severe environmental and health problems, and efforts are underway to incentivize the use of these residues for energy purposes. However, significant challenges exist in terms of transport, aggregation, cost, storage etc. which are hindering the scale up of accessible biomass feedstock.

The third webinar of the India Bioenergy series '*Matching biomass supply and demand cost-effectively – optimized aggregation and supply chain efficiency in India*', the WBA will convene a broad range of stakeholders including aggregators and traders of biomass fuel who will share their experience on how to improve the accessibility of solid biomass for energy purposes.

### **Speakers:**

Ashwin Save, Co-founder, COO, Biofuel Circle

Sunil Dhingra, Director, Biotrend Energy

Tomas Jorudas, Director of Commerce, Baltpool

Sukhmeet Singh, Founder, Agri-2-Power

*The session will be moderated by WBA Executive Director, Bharadwaj Kummamuru*
