

WBA Webinar
Carbon markets - can bioenergy projects benefit financially from saving CO₂ emissions?

Date: May 27th, 2025

Time: 15:00 CEST

Registration: [Link](#)

Description: As the world intensifies its efforts to combat climate change, carbon markets are emerging as a key tool in achieving global decarbonization goals. With significant progress made at COP29, including a clearer framework for carbon markets under the Paris Agreement, there's growing attention on innovative solutions like biogenic CO₂ utilization. These solutions not only contribute to global climate efforts but also present valuable opportunities for industries to generate revenue through carbon credits.

Bioenergy projects are particularly well-positioned to tap into these opportunities by reducing CO₂ emissions and participating in both voluntary and compliant carbon markets. This webinar will explore how bioenergy projects can financially benefit from these carbon credit systems.

The session will feature insights from industry leaders, carbon market experts, and technology innovators, offering a deeper understanding of how bioenergy projects can navigate the complexities of carbon markets and capitalize on the emerging opportunities for biogenic CO₂ solutions.

Draft Agenda:

Welcome & Opening Remarks - Christian Rakos, WBA President

- Understanding Carbon Markets
 - Speaker: *Hendrik Schuldt – Managing Director, Carboneer*
- Opportunities for bioenergy projects in Carbon Markets
 - Speaker: *Eva Teekens/Henrik Harryson – CCO, Jord*
- Industry Experience from the Cookstove sector
 - Speaker: *Robert Müller, Carbon Consultant, Emerging Cooking Solutions*
- Open Discussion

Closing Remarks - Christian Rakos, WBA President
