CM BIOMASS – CERTIFICATION SCHEMES

SBP – Sustainable Biomass Program - Largest and most widely accepted certification system for woody biomass; it includes a greenhouse gas module and is EU recognized – 85% of pellet volume

FSC – Forest Stewardship Council

PEFC – Program for Endorsement of Forest Certification

ISCC – International Sustainability and Carbon Certification - Agricultural biomass and residues.

SURE – Sustainable Resources verification scheme - Forest and agricultural biomass and residues.

GGL – Green Gold Label

ENplus – Wood pellet quality certification scheme

All parts of the certified biomass value chains are governed by well-defined sustainability requirements and independent certification bodies actively monitor our compliance.

CM BIOMASS AND SBP

Why is the SBP certification system so important for CM Biomass?

- Widely recognized by industrial end-users in the EU, the UK and Japan
- Recognized by the EC as a voluntary scheme for woody biomass sustainability
- Specifically designed for application in the biomass sector:
 - Risk-based approach in feedstock sourcing
 - Standards for collecting and reporting greenhouse gas data from biomass producers.
 - Highly reliable and practical system for communicating certification claims and data in DTS
 - Agile towards the ever-changing regulatory framework for biomass, eg. RED III and EUDR

How does CM Biomass engage with SBP?

- Participate in EUDR module development
- Contribute time and opinions to the Standards committee

CM BIOMASS

THANK YOU
